

TEARDROP AND HALF TEARDROP INSTALLTION USING PREMIUM POLE SET

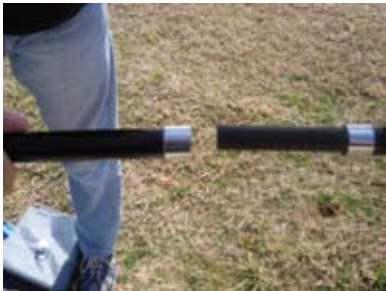

1. Remove all parts of the premium pole kit. Included parts should be flag, pole set, rotating ground spike and elastic cord. Optional parts include spider base and water bag. Imediately notify if any parts are broken or damaged.

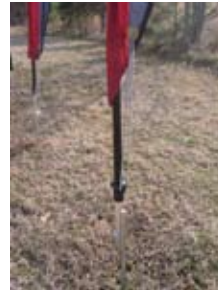

5. Using a hammer, pound the rotating ground spike into the ground.

HAMMER THE SPIKE SIDE OF THE POLE - NOT THE ROTATING CONNECTOR SIDE

2. Connect the sections of the premium pole set.

Small Set - 2 parts
Medium Set - 3 Parts
Large Set - 4 parts

6. Connect the elastic cord through the grommet/leather tab on the flag and then around the connector at the base of the pole set.

TEARDROP FLAGS - keep the elastic cord tension very tight

HALF TEARDROP FLAGS - keep the elastic cord tension minimal to ensure the proper curve of the flag.

3. Insert the the pole tip through the sleeve of the flag.

7. Enjoy your beautiful Flag!

Proper Maintenance is Key for the longevity of your flag.

- Take down during high winds and extreme weather.
- Check on spikes and and elastic cords periodically.

4. Make sure the tip of the pole goes to the end of the reinforced pole sleeve end.

Do not fly your Premium Pole Set and Flag in extreme winds (25 mph or higher) or severe weather storms. Do not use near overhead electrical wires.

This must be followed or injury or death may result, and all warranties will be void.
